

TRANSYSTEMS PROJECT PROFILE

CSX INTERMODAL TERMINAL EXPANSION

Worcester, Massachusetts

TranSystems was part of the Ragnar Benson design-build team to reconstruct and expand the CSX Worcester Intermodal Terminal, located near the downtown business district of Worcester. The work included a highway bridge, retaining walls, Roller Compacted Concrete pavement, grading, drainage and utility improvements, track work and site lighting.

In addition to the expansion of the terminal new technology including an Automatic Gate System (AGS), security systems, solar power initiatives, Hybrid Diesel Electric cranes, steel ties, and LEED certified buildings will transform this terminal into a modern “Green” facility.
