Visionary Women: Champions of Transportation

What do you want to see in the future for women in transportation?

Happy Women’s History Month. My wish for the future of women in transportation is the same as my wish for women in all industries, which is equal opportunity, equal pay and equal representation at all levels.

What is your biggest piece of advice for women in transportation?

I’d also like to share a piece of advice, something that’s been useful to me in my career which is to build and use your network. It might seem like a time consuming effort. You might not know where to start. WTS can help with that but I believe it is important to regularly get together with women and men in your industry at your level and all different levels to learn from each other, to bounce different ideas off of, and if nothing else you might have some fun and make some friends in the process. Thanks for listening and all the best.
