Visionary Women: Champions of Transportation

What do you want to see in the future for women in transportation?

What I would love to see in the future for women in transportation is more women in transportation; especially in transportation related fields like engineering, civil engineering, roadwaying, and that’s what kind of lead me to start a non-profit two years ago to work with young girls interested in STEM. It’s great to see our future engineers, especially our future female engineers at work.
