What is your biggest piece of advice for women in transportation?

My biggest accomplishment has been to combine traffic modeling and engineering with my background knowledge of urban planning and architecture. I also served as the chapter secretary for Engineers Without Borders NY Professional Chapter.

What do you want to see in the future for women in transportation?

In the future for women in transportation, I would like to see women getting encouragement to bring in new ideas to the table and get recognition for that. My biggest piece of advice for women in transportation would be to learn new skill sets, extend our expertise, get diversified, and not to be afraid to take on new challenging roles and positions. Thank you.
