

LOCHNER, a leader in transportation engineering, is seeking a highly motivated individual to join our team as a mid-level traffic engineer in our growing Pittsburgh office. The Pittsburgh office is transportation focused providing traffic analysis and design services to a variety of public and private agencies. Ideal candidate is a collaborative problem solver who produces organized, accurate work. Our team seeks someone with a positive attitude who works well with others, learns quickly and wants to make a difference. We are looking for a traffic engineer with the desire to work together and grow with other experienced and established engineers in an exceptional team environment. We seek those who strive for excellence in their own work.

### **Responsibilities**

- Management and marketing of transportation projects with a focus on transportation planning and traffic engineering.
- Business Development—Assist in development of new business via client meetings and participation in promotional activities and professional organizations.
- Mentor junior staff and help grow the traffic department.
- Conduct signal timing studies, evaluation of signal systems, and adaptive signal systems.
- Design ITS, traffic signal, and lighting systems.
- Design complex traffic control during construction plans.
- Conduct field reviews to identify safety and operational issues.
- Coordinate work tasks and reviews to ensure accuracy and quality of work.
- Clearly communicate work through drawings, documents, reports, and verbal exchange.
- Perform work within project deadlines.
- Coordinate internal traffic work to support other Lochner offices.

### **Qualifications**

- B.S. degree in Civil Engineering.
- Professional License in Pennsylvania or ability to obtain PA PE within one year of hire.
- PTOE preferred.
- A minimum of 5 years of traffic/transportation engineering experience.
- PennDOT and/or PA Turnpike experience desirable but is not required
- Experience with traffic analysis, microsimulation, and forecast modeling software.
- Experience with VISSIM software preferred.
- Experience using Microstation design software.
- Solid verbal and written communication skills.
- Outstanding interpersonal and customer service skills.
- Strong organizational skills and attention to detail.

### **Compensation**

LOCHNER provides an exceptional compensation package, exciting project work and a commitment to work/life balance.

### **Benefits**

Here are some of the many benefits we provide employees:

- Flex Days - Employees enjoy taking one flex day every bi-weekly pay period
- Health, Dental and Vision Insurance
