

## Traffic Engineer

Rybinski Engineering is seeking a creative and motivated Traffic Engineer. The ideal candidate will be a registered Professional Engineer with about five years of experience in traffic engineering. Our traffic engineers are responsible for working in teams on all aspects of the profession, including planning, analysis, and design. They are focused and dedicated with strong attention to detail.

The opportunities for career advancement at Rybinski Engineering are uniquely diverse and growth oriented with professional organization support, networking, encouraged attendance at professional development events, and project management training early in your career. We invest deeply in the development of our people. As a result, this is a highly competitive position; you will work with many of the best traffic engineers in the region on high-profile projects.

### Work-life balance

Rybinski Engineering is unique in our industry in the flexibility and autonomy we provide all of our people. As a fully remote firm since 2012, we provide what you need to be successful:

- Flexible hours within a 37.5-hour work week
- State-of-the-art home office equipment supplied and maintained by the company
- A collaborative mindset where we openly communicate with each other and clients
- A highly competitive compensation package including full benefits, generous paid time off, and 10 holidays

More about [work-life balance at Rybinski Engineering](#).

### Location

We are fully remote with a client base in Delaware, Pennsylvania, and Maryland. To provide exceptional service to our clients and each other, we have frequent in-person meetings, offer on-site client support at times, and are available for field work on short notice.

### Responsibilities

This position may include a variety of opportunities based on the firm's needs as well as the candidate's interest and background:

- Traffic operational analysis for assignments like studies and transportation management plans
- Design of ITS devices, signals, pavement markings, and signing
- Support for innovative ITS planning and program management

### Position Qualifications

- Bachelor of science in civil engineering
- Professional Engineer registration
- Five years of traffic engineering experience (though we will carefully consider candidates with more experience for more senior positions)
- Valid driver's license
- Ability to travel to client sites with same-day notice within Delaware, Pennsylvania, and Maryland
- Effective written and oral communication skills

To apply, email [info@rybinski.com](mailto:info@rybinski.com) with "Traffic Engineer" in the subject line.
