Job Description

Modern Mobility Partners, a full-service transportation planning and traffic engineering firm founded in January 2018, is looking for a **Transportation Planning Project Manager** with interest in transportation planning across all modes, project management, data analytics, transportation modeling and emerging technologies.

This position will assist our growing firm in the project management of transportation and transit planning studies, reports, and analyses. This position will also include management of entry and mid-level staff. The candidate will have the opportunity to support senior leadership in project delivery and business development in the field of transportation and transit planning, travel and traffic modeling, project prioritization and performance measures, and funding/grant strategies.

The individual will have the opportunity to work with a dynamic team to complete a variety of projects. Tasks may include but are not limited to:

- Manage tasks and/or projects, including developing scopes, schedules, and budgets
- Conduct project team and client meetings regularly and communicate on project or task status, schedule and project activities
- Prepare meeting agendas, meeting notes, project progress reports and team action items
- Prepare presentations to clients and project team as needed
- Coordinate junior and mid-level staff on assignments
- Write, edit and review reports and documentation
- Conduct or provide methodology for advanced transportation data analysis or transportation modeling
- Conduct QA/QC on staff technical analyses and writing
- Identify challenges and opportunities and develop solutions that best meet the project needs
- Manage, mentor and train junior staff

Required Qualifications

- Master's degree in City Planning or Transportation Engineering
- Project management experience
- Proficiency in Microsoft Office Suite, specifically Excel
- 7+ years of professional transportation planning experience at transportation agencies or consultants at a minimum

- Ability to think independently, including identifying challenges, opportunities, and solutions

Preferred Qualifications

- One or more travel demand modeling software experience including CUBE, VISUM, or TransCAD
- One of more traffic modeling software experience including Synchro, Microstation, or VISSIM
- AICP or PE license or ability to obtain within 1 year

Why Choose Modern Mobility Partners?

Learn transportation planning methods and practices from some of the most reputable transportation planners and project managers in the industry. Be part of an exciting new firm with great energy and a desire to push the envelope, think outside the box, and provide value to our clients and teaming partners.

This position offers a lot of hands-on experience and provides great opportunities to work on a variety of projects across different transportation arenas. We also offer commuting and cell phone reimbursements, 100% paid medical benefits, 401K after 1 year and so much more.

In 2020, Modern Mobility Partners was awarded Atlanta Business Chronicle's Best Places to Work.

Modern Mobility Partners is an equal opportunity employer. We are proud of our diversity and embrace humans of every background, race, religion, color, national origin, gender, gender identity, sexual orientation, age, marital status, veteran status, and disability status. We are not in the habit of hiring jerks, even brilliant ones.
