### Job Description

Modern Mobility Partners, a transportation planning and traffic engineering firm founded in January 2018, is looking for a **Transportation Planning Intern** with interest in transportation planning across all modes, GIS, travel demand modeling, and/or smart mobility planning, such as new and emerging technologies.

This position will assist our award-winning growing firm in the preparation of transportation planning studies, reports, and analyses. Specifically, the individual will have the opportunity to explore their transportation interests and work with a dynamic team to complete a variety of projects, such as:

- Smart mobility planning reflecting new and emerging technologies and trends
- Long range transportation plans, regional transportation plans, comprehensive transportation plans, multimodal plans, etc.
- Statewide transportation plans across all modes
- Transit planning for urban and rural transit systems, as well as fixed route and on-demand service
- Corridor studies
- Infrastructure funding strategies and revenue forecasting
- Federal discretionary grant applications under the Bipartisan Infrastructure Law
- Desktop scans (literature reviews) or research projects, such as for the National Cooperative Highway Research Program (NCHRP)

Tasks may include but are not limited to:

- Assist with research and studies in transportation planning including best practices, literature scans, and emerging technologies
- Collect, compile, review, and organize data for planning studies and / or travel demand modeling analysis
- Data analysis, including project cost estimates and revenue forecasts, return on investment, calculating project performance metrics, reviewing and processing survey data, etc.
- Geographic Information Systems (GIS) mapping and analysis
- Writing and editing reports
- Prepare PowerPoint presentations
- Communicate with Project Managers on status of task deliverables

### Required Qualifications

- Bachelor's degree in City Planning, Economics, Engineering, or related field

- Proficiency in Microsoft Office
- Excellent verbal and written communication skills

### **Preferred Qualifications**

- Pursuing a Master's degree in City Planning, Public Administration, Engineering, or related field
- Proficiency in ArcGIS
- Travel demand modeling coursework
- Interest in programming and coding such as R

\*\*Relocation assistance is not available for this position\*\*

### **Why Choose Modern Mobility Partners?**

Learn transportation planning methods and practices from some of the most reputable transportation planners and project managers in the industry. Be part of an exciting new firm with great energy and a desire to push the envelope, think outside the box, and provide value to our clients and teaming partners.

This position offers a lot of hands-on experience and provides great opportunities to work on a variety of projects across different transportation arenas. We also offer commuting and cell phone reimbursements, tuition assistance after 1 semester, and the potential to secure a permanent position with our firm.

In 2020, Modern Mobility Partners was awarded Atlanta Business Chronicle's Best Places to Work.

*Modern Mobility Partners is an equal opportunity employer. We are proud of our diversity and embrace humans of every background, race, religion, color, national origin, gender, gender identity, sexual orientation, age, marital status, veteran status, and disability status. We are not in the habit of hiring jerks, even brilliant ones.*
